

Advanced Quality Control at Satori Seal

By measuring and inspecting in house we assure our customers that they get exactly what they ordered. With the Micro-Vu video measuring machine Satori makes sure that every part we sell to our customers meets their specifications helping to eliminate costly delays and down time due to non-conforming product. If you can't measure it, you can't control the quality.

Satori Seal is an ISO 9001:2000 certified company. We have received many quality recognition awards and are on "Dock to Stock" programs with several of our customers who rely on us to supply the right part everytime.
